DETAILED ACTION

1. In view of the appeal brief filed on 10/15/2001, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. After further review of claims and applicant's argument presented in appeal brief the examiner agree all the claims not directed to a single invention therefore a restriction requirement is presented in this office action.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-12,21-25, drawn to a semiconductor substrate, classified in class 345, subclass 1 and 214.
- II. Claim13-16, drawn to memory array and pixel array, classified in class 345, subclass 90.

Art Unit: 2673

III. Claims 17-20, drawn to a method of displaying information on semiconductor substrate and memory array, classified in class 345/98.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II, II and III and I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention Groups II does not rely on specific details of the subcombination of as claimed in Group I such as LCOS over a semiconductor. The subcombination has separate utility such as memory and pixel array with refresh memory, thus the combination is not essential to the combination..

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention Groups III does not rely on specific details of the subcombination of as claimed in Group I such as LCOS over a semiconductor. The subcombination has separate utility such as a method of displaying information in a semiconductor substrate and refresh cycle, thus the combination is not essential to the combination.

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention Groups II does not rely on specific details of the subcombination of as claimed in Group III such as a method of

displaying information in a semiconductor substrate and refresh cycle. The subcombination has separate utility such as a memory and pixel array with refresh circuit to refresh memory, thus the combination is not essential to the combination.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.
